## **DETAILED ACTION**

### ***Response to Amendment***

1. This action is in response to Applicant's amendment filed December 23, 2008. Claims 1, 5, 6, 8, 10-18, 20, 22-24, 28, 47, 48 and 50 have been canceled. Claims 29, 31, 33-41, 43, 45 and 46 are pending.
2. The previously pending rejections to claims 1, 5, 24, 28, 47, 48 and 50 under 35 USC 112, second paragraph, have been withdrawn as moot.  
  
The previously pending rejections to claims 1, 5, 6, 8, 10-18, 20, 22 and 23 under 35 USC 101 have been withdrawn as moot.

### ***Reasons for Allowance***

3. Claims 29, 31, 33-41, 43, 45 and 46 are allowed.
4. The following is an examiner's statement of reasons for allowance:  
  
With respect to independent claims 29 and 36, none of the prior art of record, taken individually or in any combination, teach inter alia, validating the requested appointment against a number of scheduling constraints and against projected service resources for that window on the first day, including dividing a service area into a number of work areas, assigning a field service representative to each work area where each field service representative has an associated skill level, assigning at least one skill level to each work area, and assigning at least one window hierarchy to each work area, each window hierarchy corresponding to a set of

appointment windows and associated with at least one skill level assigned to the work area, the scheduling constraints having allowable appointment windows during which appointments are permitted to be scheduled; and scheduling the appointment in the specific appointment window on the first day when the validation indicates the appointment can be scheduled given the scheduling constraints and projected service resources, in response to the specific appointment window overlapping the allowable appointment window, time for the appointment scheduled in the specific appointment window proportionally to the amount of overlap between the specific appointment window and the allowable appointment window.

5. The prior art references most closely resembling Applicant's claimed invention are Lesaint et al (USPN 6,578,005), Powell et al (US 2001/0049619), and Babayev et al (USPN 5,615,121).

Lesaint et al disclose scheduling of a split task, wherein the task is appointed to a specific timeslot, and aggregation of windows are necessarily grouped into an all day appointment window, wherein morning and afternoon appointments equate to an all day appointment with no remaining basic appointment windows. In addition, Lesaint discloses if a task could overrun an overtime limit, then task is only scheduled if it can be split.

Powell et al disclose geographical distribution of service orders by service order type, threshold parameters including the geographical distribution of the service technicians and the technician's skill set, geographic distribution of service requests

includes at least one service technician, wherein the service technician has an associated skill set, a service provider considering bands 20 of time windows, based upon technician skill level, and the service provider providing the customer a set of days and time windows in which the service provider can optimally fulfill the order.

Babayev et al disclose informing the customer service representative of the reason either validation failed (i.e., the customer preferred time interval cannot be accommodated due to previous customer request).

However, none of the cited prior art discloses validating the requested appointment against a number of scheduling constraints and against projected service resources for that window on the first day, including dividing a service area into a number of work areas, assigning a field service representative to each work area where each field service representative has an associated skill level, assigning at least one skill level to each work area, and assigning at least one window hierarchy to each work area, each window hierarchy corresponding to a set of appointment windows and associated with at least one skill level assigned to the work area, the scheduling constraints having allowable appointment windows during which appointments are permitted to be scheduled; and scheduling the appointment in the specific appointment window on the first day when the validation indicates the appointment can be scheduled given the scheduling constraints and projected service resources, in response to the specific appointment window overlapping the allowable appointment window, time for the appointment scheduled in the specific

appointment window proportionally to the amount of overlap between the specific appointment window and the allowable appointment window.

6. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
